

Roll-Rite® Super Duty EX Series

Safe. Simple. Automated Tarping.

High Capacity Tarp Systems for Scrap and Gondola Trailers

Roll-Rite® Super Duty Series EX for automated tarping delivers unmatched safety, durability, and efficiency. Engineered to fit extreme duty trailers, our pre-assembled systems install fast and perform reliably—so you can secure every load and keep your business moving.

A Clarience Technologies Company

Quality, durable components engineered for demands of extreme trailer tarping

Super Duty EX High Capacity Tarp Systems may include:

Super Duty EX Electric Motor

- Designed for high-torque, extreme tarping
- Spur and helical gear configuration for efficient, reliable power transfer
- Forged, heat-treated gears, precision-ground bearings for extended transmission life
- Fabricated and tested in-house for quality control and long-life, reliable performance
- Industry's only 5-year non-prorated warranty against premature wear-out

High Capacity Housing

- Holds up to 57 ft. of Super Tough mesh
- Expands up to 10' wide to cover heaped loads
- Dual mounting orientations, including low-mount option for no added trailer height
- Allows tarp arm to drop below top rail for unobstructed loading
- Faster installation with no gussets and 2/3 fewer fasteners

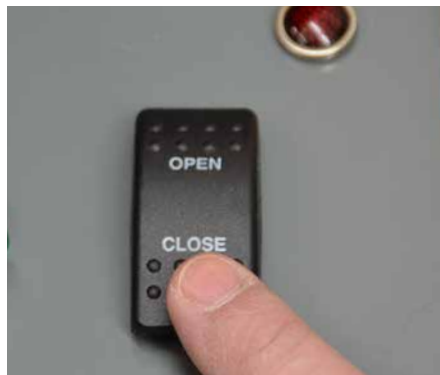

Under Body EX Pivot Mount

- Compact, narrow-profile design with external mounting flanges
- Eliminates side wall bolts for easier installation
- Pre-set pin ensures optimal tarp tension based on spring capacity
- Patented roller-bearing pivot for smooth, reliable operation
- 12–16 spring capacity for proper tarping tension

Extreme Duty Arms

- Ultra-durable, lightweight, specially treated extruded aluminum arms for maximum strength-to-weight performance
- Telescoping upper arm for easy, adjustable installation
- Designed for demanding scrap and gondola trailer applications

Rite-Touch™ Controls

- Motor reversing relay ensures safe, reliable tarp operation
- 35-Amp breaker protects motor and wiring from damage
- Momentary rocker switch stops tarp when released for precise control
- Provides consistent motor protection and operational safety

Rite-Touch™ Amp-Sensing Option:

- Built-in amp sensing technology with automatic shutoff protection
- Prevents breaker trips if switch is not released during tarp wind-up
- Eliminates need to reset tripped breakers
- Reduces downtime and improves operational reliability

SUPER DUTY EX8012

For Scrap Trailers Using Up to 48 feet of Tarp — System Part No. 68012:

- Super Duty Gear Motor, 104" Tarp Spool with High Capacity Housing
- 12-Spring Extreme Under Body Pivot Set
- 264" Tarp Arms and Wide Tarp Bow Set

SUPER DUTY EX8016

For Scrap Trailers Using Over 48 feet of Tarp — System Part No. 68016:

- Super Duty Gear Motor, 104" Tarp Spool with High Capacity Housing
- 16-Spring Extreme Under Body Pivot Set
- 264" Tarp Arms and Wide Tarp Bow Set

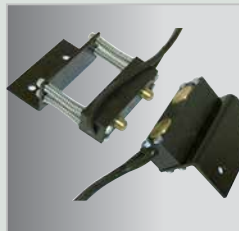

Accessories:

Convenient trailering accessories for one-stop purchases.

• Bow Centering Wedges

• Contact Plates: Reduce trailer wiring

• Dual Conductor Plug Set

Roll-Rite® Tarps

SUPERTOUGH MESH

LOAD TYPE

Challenging scrap, construction & demolition

FABRIC

Premium 16 oz heavy, 7x7 weave with 7,500 denier UV protected strands of polypropylene breathes enough to minimize flapping

KEY BENEFIT

Longer life, up to 3x-5x wear life over other scrap tarps
